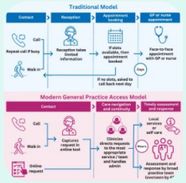
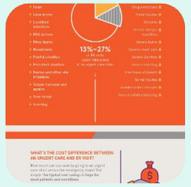
The Problem: Overburdened Healthcare



Overcrowded Waiting Rooms

Long lines hide urgent cases.



Nepal's healthcare system faces significant hurdles:

Hospitals are frequently **overcrowded**, leading to excessively long waiting times for patients.

Lack of digital **triage systems** means critical emergencies often wait in line with non-urgent cases.

Crucial **chronic and maternal follow-ups** are frequently missed, compromising long-term health outcomes.

Rural patients endure **long, arduous journeys** to hospitals without prior assessment, often in vain.

Made with GAMMA

Quick & Efficient Healthcare Queue Management

Skip the long lines. Get priority care. Track your health.

Book Token

Track Token

Assisted Booking

SMS Booking

Quick access to all your healthcare needs

The Vision: Revolutionizing Care Access

SmartHealth Nepal aims to transform healthcare through a unified digital platform:

Digital Patient Flow

A seamless system for managing patient journeys from entry to follow-up.

Intelligent Triage

Pre-triage assigns priority levels: emergency, priority, normal, or chronic cases.

Reduced Wait Times

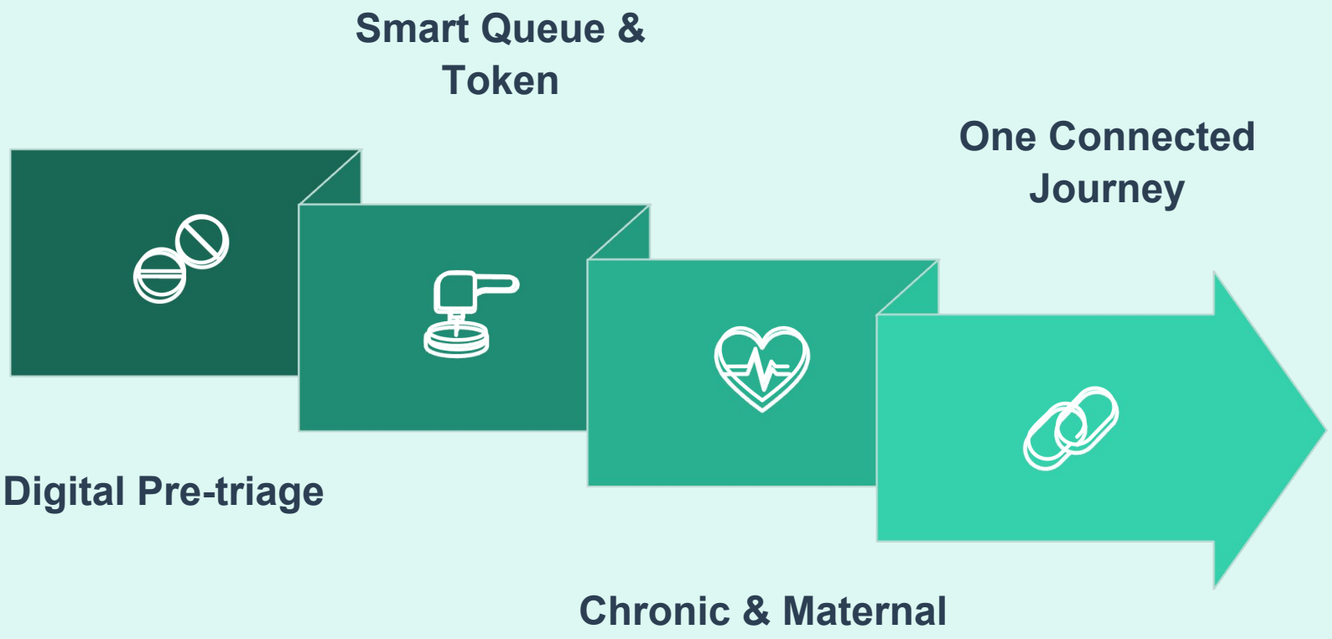
Time-window tokens minimize chaos and waiting for scheduled appointments.

Lifelong Health Records

A comprehensive digital health record accessible from birth onwards.

Made with GAMMA

Core Logic: The Connected Patient Journey



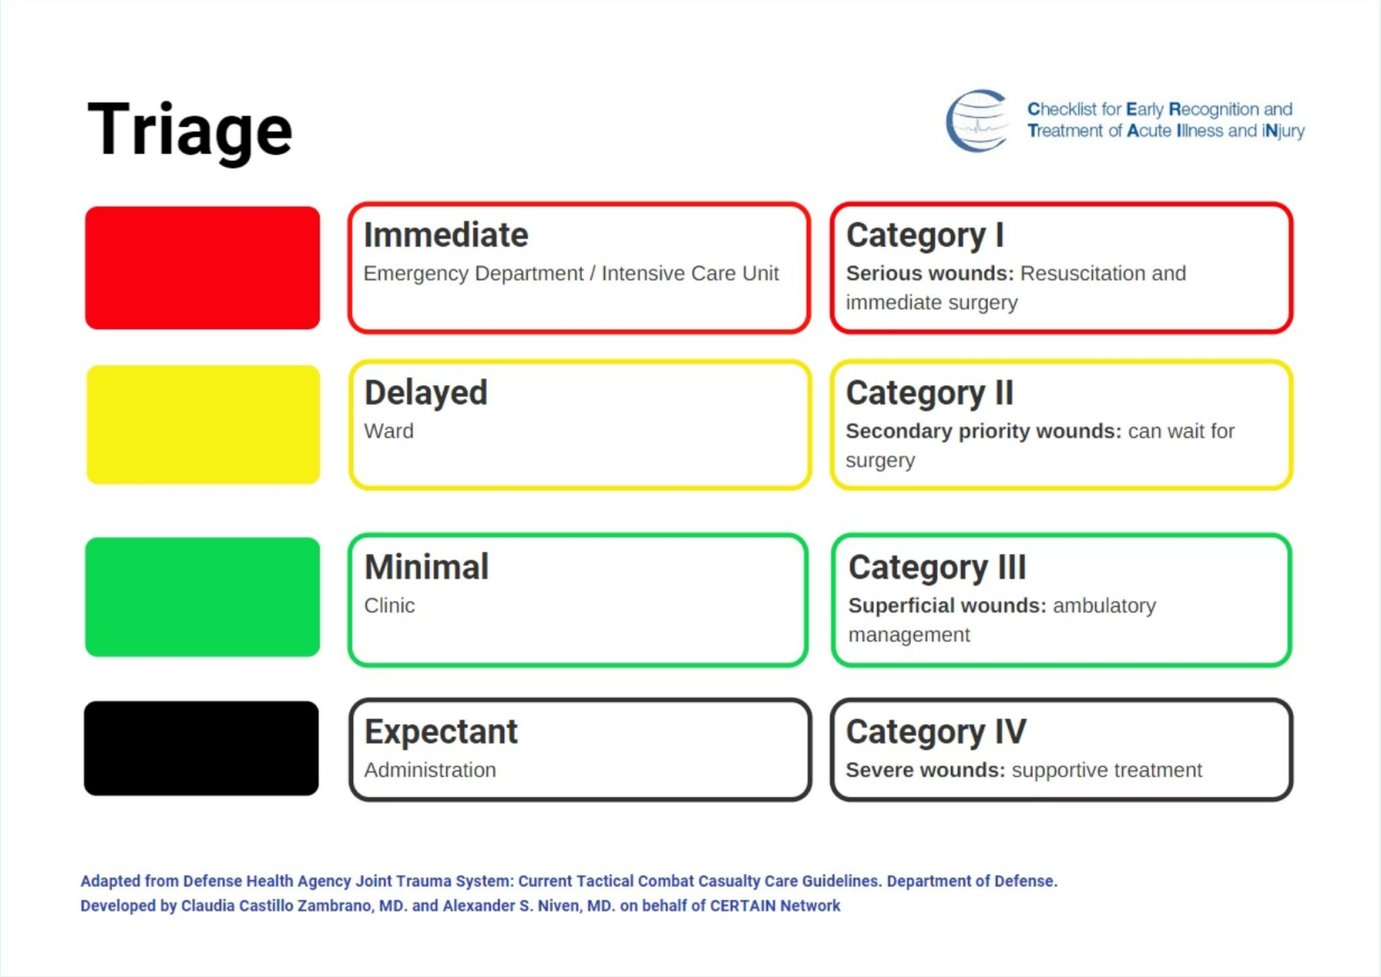
Our system integrates key functions to create a cohesive and efficient patient experience across all touchpoints.

Made with GAMMA

Smart Pre-Triage System

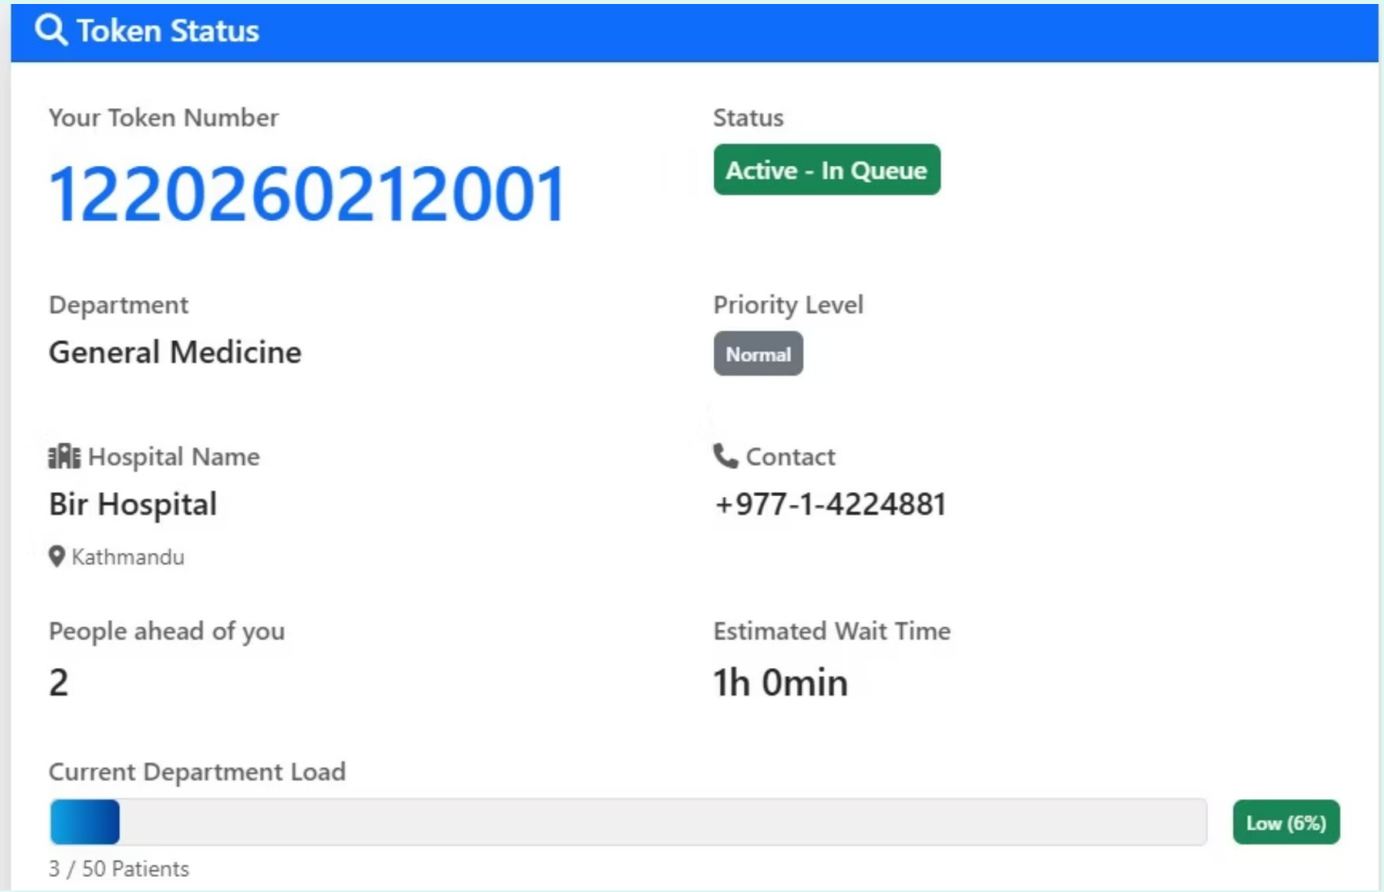
Our innovative pre-triage module:

Simple health questionnaires are completed before appointment booking. Automatically **classifies patient urgency**: Emergency, Priority, Normal, or Chronic. **Emergency tokens** are granted instant priority, directing them for immediate care. Significantly **reduces initial chaos** and misdirection at hospital entrances.



Made with GAMMA

Smart Queue & Time-Slot Management



Optimizing hospital flow and patient convenience:

Token booking by specific department and preferred time window.
Dynamic wait-time prediction keeps patients informed and reduces anxiety.
Emergency tokens automatically **override the normal queue** for critical cases.
A comprehensive **staff dashboard** enables efficient management of patient flow.

Made with GAMMA

Chronic & Maternal Tracking

Automated Follow-ups

Ensuring continuous care for patients with chronic conditions, reducing missed appointments.

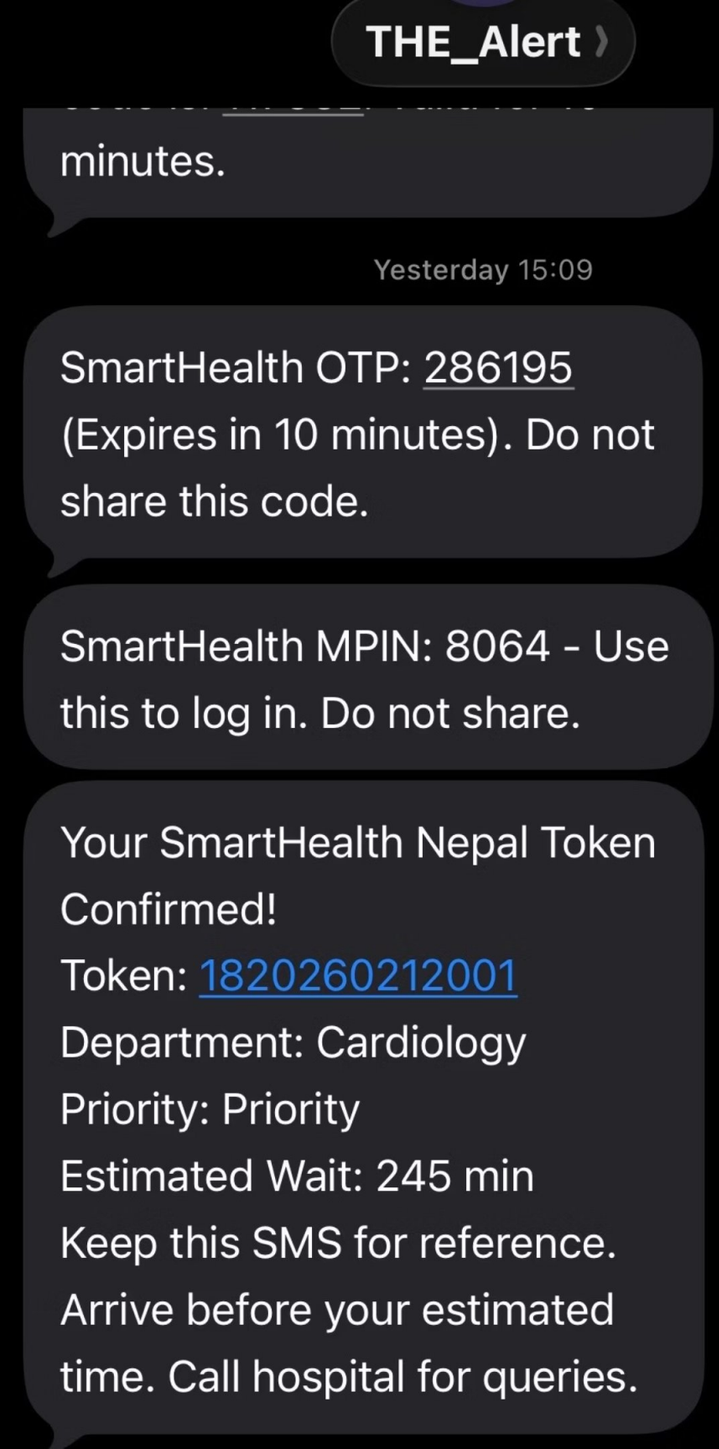
Antenatal & Vaccination Alerts

Timely reminders for crucial check-ups and immunization schedules for mothers and children.

Multi-Hospital Health History

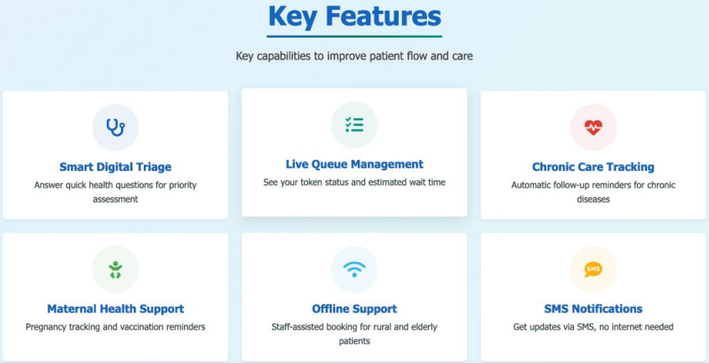
A unified digital health record that compiles patient data from various healthcare providers.

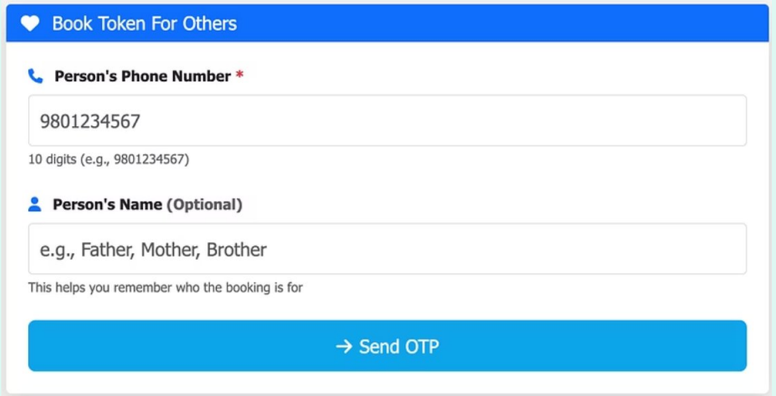
Made with GAMMA



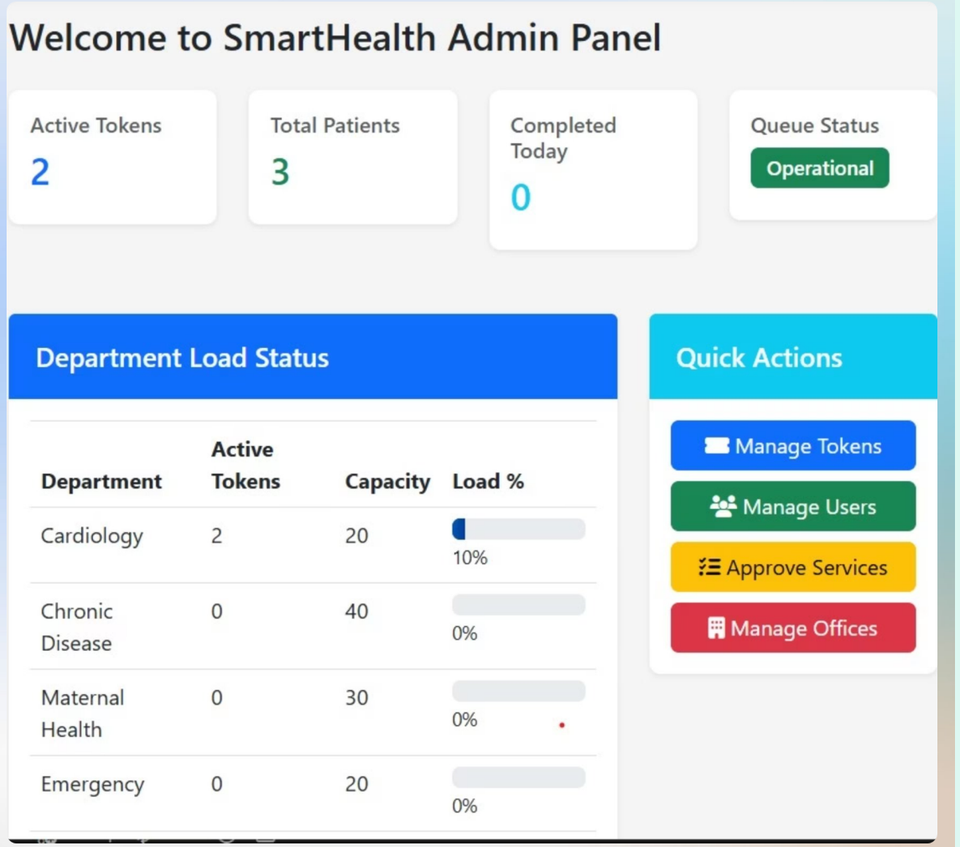
Inclusive Access for All

Assisted booking facilitated by hospital staff or local health posts.
SMS-only mode ensures accessibility for users with limited smartphone access or low internet connectivity.
Designed to function effectively in **rural and low-internet areas** of Nepal.
Caterson to both **tech-savvy and non-tech patients**, bridging the digital divide.





Made with GAMMA



Hospital & Admin Control

Empowering healthcare providers with robust management capabilities:

Real-time Dashboard

Instant overview of queue status, patient tokens, and dynamic flow.

Emergency Override

Immediate prioritization for critical cases, ensuring timely intervention.

Patient Transfer

Seamless movement of patients between departments or across different hospitals.

Capacity Tracking

Tools to monitor and manage hospital capacity and resource allocation.

Made with GAMMA

Strategic Advantages of SmartHealth Nepal

Workflow Efficiency

Beyond simple appointments, we optimize the entire patient journey.

Inclusive Design

Accessible for rural, low-tech, and urban users, bridging digital divides.

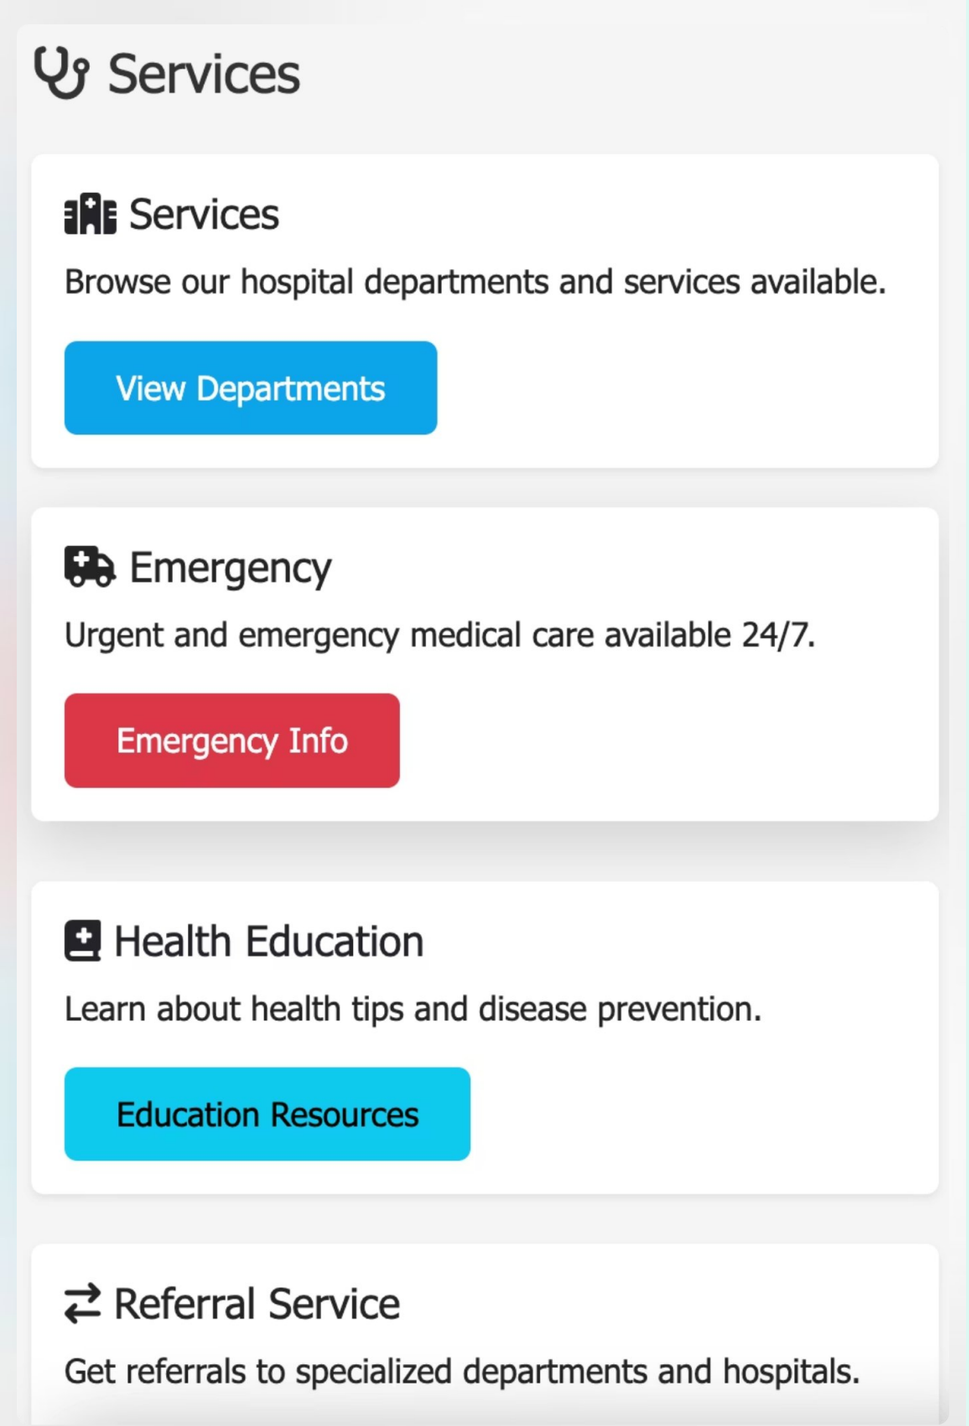
Sustainable Operations

Reduces reliance on paper and minimizes missed follow-ups, promoting better health outcomes.

Nationwide Scalability

Designed for seamless implementation across all government hospitals in Nepal.

Made with GAMMA



Impact & Closing: A Healthier Nepal

SmartHealth Nepal is set to revolutionize healthcare access and quality across the nation, delivering profound and lasting benefits:

Streamlined Care

Significantly shorter queues and faster, prioritized emergency care save lives and reduce patient burden.

Proactive Health

Continuous chronic and maternal tracking ensures timely interventions and improved long-term health outcomes.

Empowered Patients

Every patient receives a lifelong digital health card, granting them full control and access to their medical history.

National Scalability

A practical, robust, and scalable solution designed to uplift Nepal's entire healthcare infrastructure.
